<p><b>Software Product Design, Development and Support</b></p> <ul style="list-style-type: none"> <li>• Java / J2EE Programming (Spring, Hibernate, Struts, EJB, JMS).</li> <li>• .Net Development (C#, ASP.Net, VB .Net ) , VB, ASP</li> <li>• Other Technologies (PHP, Perl-CGI, C,C++)</li> <li>• Mobile Applications (J2ME, Brew, WML)</li> <li>• Web 2.0 Technologies (AJAX, RSS, Blog, XHTML, CSS, XML)</li> <li>• Unix/Linux Applications (Shell Programming)</li> <li>• Database Design and Applications (MYSQL, MSSQL, Oracle, MS-Access)</li> <li>• Mathematical Modeling</li> </ul>	<p><b>Services</b></p> <ul style="list-style-type: none"> <li>• Enterprise Applications</li> <li>• Web Applications</li> <li>• B2B Applications / Web Services</li> <li>• Desktop Applications</li> <li>• Customized Applications</li> <li>• Re-Engineering Services</li> <li>• Linux / Windows Remote Server Administration</li> <li>• 24X7 Production Support</li> <li>• Strategic Development Center</li> <li>• System Analysis</li> <li>• Business Process Outsourcing</li> <li>• QA Services</li> </ul>	<p><b>End To end Solutions</b></p> <ul style="list-style-type: none"> <li>• Supply Chain Management for SMEs</li> <li>• RFID solutions for Warehouse, production and retail Management</li> <li>• Emergency systems</li> <li>• Business Continuity Systems</li> <li>• Manufacturing Execution System</li> <li>• Customer Care Systems</li> </ul>
		<p><b>Design and Animations</b></p> <ul style="list-style-type: none"> <li>• GIF Animation</li> <li>• Flash Animation</li> <li>• Flash Presentations</li> </ul>

## **Strategic development centre**

SDC is specially designed for the corporations, which need long term quality software development and support. By opting this you can

- Reap the benefits of your own “Extended business arm”. This business model has benefits of outsourcing coupled with dedicated & permanent resource base with strong skill set.
- Seamless integration
- Get advantage of global delivery model in terms of cost, time and productivity.

## **Value proposition**

- Strong technical team.
- Efficient turn around time.
- Quality.
- Cost benefit.
- Confidentiality.

## **Our Project Experience:**

**Currently developing a Website** for an education institute, which provide platform to take online tests for various competitive exams. The website would also have Blogging and mailing modules. User can download the test by paying the amount and can get various reports based upon his performance after submitting the test.

The project uses latest of technologies in JAVA including springs, hibernate and struts.

**Developed an ERP system** for a Thermo- electric component manufacturing company. The system takes care of HR system, Production planning and Supply chain processes. The real challenge here was the integration of various diversified departments.

The Project was developed in VB.NET with MS SQL server as database.

**Process re-engineering** for an Automobile company for their Production planning system. We did a study on the current system and redesigned the process so as to align them with the best practices worldwide. The system optimizes the production sequence while taking various production constraints into account.

.NET framework coupled with Oracle as database was used.
